IT Support | Technical Support | Help Desk

West Jakarta, DKI Jakarta, Indonesia | 089618186161 | raveljonathan.zhang@gmail.com | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

---

Computer Science graduate with hands-on experience in technical support, hardware and software troubleshooting, and end-user support across both web-based systems and physical/robotics equipment. Proven track record diagnosing and resolving technical issues in real time, developing internal tools to fix operational problems such as account access conflicts, and maintaining equipment to ensure consistent uptime. Solid foundation in Cyber Security, strong problem-solving skills, effective time management, and experience communicating clearly with users of varying technical backgrounds to deliver practical solutions.

## WORK EXPERIENCE

---

### Robotic Instructor | Cyberspace Edu Tech

February 2026 – Present | Jakarta, Indonesia

- Provide hands-on technical support to students setting up, configuring, and troubleshooting robotics kits, sensors, controllers, and related hardware/software during lessons.
- Diagnose and resolve hardware malfunctions and software/programming errors in real time, minimizing class disruption and ensuring equipment stays operational.
- Guide students through the integration of hardware components with programming logic, translating technical issues into clear, step-by-step explanations for non-technical users.
- Maintain and inventory robotics equipment, ensuring devices are properly configured, updated, and ready for use across class sessions.
- Deliver structured technical instruction while adapting explanations to varying levels of user technical proficiency.

### Coding Instructor & Interim Lead Teacher | KodeKiddo

July 2025 – February 2026 | West Jakarta, Indonesia

- Provided direct technical support and troubleshooting to end users (students) facing issues with devices, applications, and learning platforms across Scratch, Python, and Web Development.
- Designed, developed, and maintained an internal web-based system (Google Apps Script) for account booking management, resolving recurring account access conflicts among staff and improving team operational efficiency.
- Performed systematic root cause analysis and technical problem-solving, then documented solutions for reuse across the team.
- Evaluated user progress on a regular basis and delivered ongoing technical support to improve understanding of system logic and problem-solving ability.
- Coordinated with curriculum and operations teams to ensure materials and supporting systems remained relevant, reliable, and easy to use across varying user skill levels.
- Entrusted with the role of Interim Lead Teacher, leading day-to-day instructor team operations, managing schedules, and maintaining service quality standards at the center.

## EDUCATION

---

### Bachelor of Computer Science | Binus University Bandung

2022 – 2026 | Academic Mobility Program at Binus Jakarta, Cyber Security concentration

- Completed an Enrichment semester through a professional internship program at KodeKiddo, applying technical skills in a real-world work environment.

- Relevant coursework: Cyber Security Fundamentals (Network & System Security), Project Management.
- GPA: 3.27 / 4.00

## TECHNICAL SKILLS

---

**IT Support & Troubleshooting:** Technical Support, Hardware & Software Troubleshooting, End-User Support, Root Cause Analysis, Technical Documentation, Equipment Maintenance

**Systems & Security:** Network & System Security Fundamentals (Cyber Security Fundamentals), Account Access Management

**Programming & Web:** Java, Python, JavaScript, HTML5, CSS3, React.js, Google Apps Script

**Productivity & Collaboration:** Google Workspace, Microsoft Office, Time Management, Team Coordination

**Soft Skills:** Technical Communication, Team Leadership, Customer Service, Problem-Solving, Teamwork

## LANGUAGES

---

Indonesian (Native) | English (Professional Working Proficiency) | Mandarin Chinese (HSK 1, Basic)
